## General Information:

- **Company:** Cura Healthcare
- **Website Purpose:** To promote and provide access to Cura's healthcare services
- **Target Audience:** Who are you trying to reach with the website? Patients, doctors, insurers, or a combination?
- **Project Scope:** What specific functionalities and features should the website have?

## Functional Requirements:

- **Content Management System (CMS):** Will the website have a CMS for easy content updates?
- **Patient Portal:** Will there be a portal for patients to manage appointments, access medical records, and communicate with doctors?
- **Appointment Booking:** Can patients book appointments online?
- **Service Information:** Does the website need to provide information about specific services offered by Cura?
- **Contact Us:** How can users contact Cura through the website?
- **Search Functionality:** Can users search for specific information on the website?
- **Accessibility:** Is the website accessible to users with disabilities?
- **Security:** How will the website protect user data?

## Non-Functional Requirements:

- **Performance:** How fast should the website load?
- **Responsiveness:** Should the website be accessible on all devices (desktop, mobile, tablet)?
- **Usability:** How easy is the website to navigate and use?
- **SEO:** Is the website optimized for search engines?
- **Branding:** Does the website align with Cura's brand identity?

## Additional Information:

- **Existing Technologies:** Are there any existing technologies being used by Cura that need to be integrated with the website?
- **Budget:** What is the budget for this project?
- **Timeline:** What is the deadline for completion?

## Katalon Studio Specific Requirements:

- **What specific functionalities of Katalon Studio will you be using for automation?** (e.g., web UI testing, API testing, mobile testing)
- **What are the testing scenarios you plan to automate?**
- **What are the expected benefits of using Katalon Studio for automation?** (e.g., increased efficiency, reduced costs, improved quality)
